

WHO BUILT IT

CONOR WATT

Lead Developer, adbank.network
Collingwood, Ontario resident
Computing Systems,
Trent University

WHY HE BUILT IT

In our lives there has never been a time with so many new problems created in the world. I realized a simple tech solution that alerts people immediately when the item they need is in stock would help solve one of the many problems.

THE PROBLEM

- Online stores are out of stock and shoppers don't know when they'll be restocked.
- Counterfeit and low quality items have flooded the market.
- People are constantly checking online stock levels, never knowing when the item they need will be restocked. This causes undue stress and anxiety, compounding the negative effects of life with COVID-19.

THE SOLUTION

A simple SMS text alert when the item you need is in stock.

HOW IT WORKS

- Users create an account
- Select the products they need
- Receive a text when the item is in stock

HOW IT GIVES BACK

The service is 100% free for seniors and medical professionals.

5% of profits will be donated to The CDC Foundation: cdcfoundation.org and Collingwood Hospital Foundation: cgmhf.com
